I started with PHSA whilst I was a student on placement completing my Master's degree. This experience was immeasurable, and I could not be more grateful for the experience. Taking your first step in your new career is a daunting experience however PHSA truly practice what they preach and provided me with extensive support, resources and a challenging yet attainable approach to transition into the role. – Karlie J, Rehabilitation Consultant

I have recently started working for PHSA as a Rehabilitation Consultant (Rehabilitation Counsellor) and have had a really good experience. The people I work with have been supportive and friendly especially when we are all not in the same office space and working from home. It has allowed me to work from anywhere I feel comfortable.

I like everything about my role. I enjoy the variety of different tasks and the opportunity to gain professional experience in a variety of schemes. What I like about the company is that they take interest in my learning styles and abilities and individualise it.. – Megan J, Rehabilitation Consultant

As a student with no prior experience within the industry and what the industry entails, I did not know what to expect and how I would fit in. However, I am so grateful for the opportunities that were granted to me during this time, in which I was able to be exposed to a variety of different assessments and case conferences, which assisted towards my development as a rehabilitation consultant today. Additionally, the support that I was provided throughout this time was immeasurable, as I was always consistently guided and mentored with how to optimally provide good rehab. If you are looking for a place to do your student placement, look no further than PHSA!. – John M, Rehabilitation Consultant
